

# ENVIRONMENTAL SERVICES

## OVERVIEW

- Site Characterization/Investigation
- Environmental Compliance/Due Diligence
- Biodiversity Surveys
- Drilling
- Site Remediation

IEI provides a full complement of environmental services for government and private sector clients. Our environmental services include hazardous materials surveys, site investigations, and remediation. By utilizing our broad geographic network of environmental professionals, we are able to rapidly mobilize the resources needed to meet client expectations.

IEI has executed more than 20 environmental services contracts throughout the world. We bring experience working with RCRA, CERCLA, TSCA, CAA, CWA, and SWDA regulations. IEI has regulatory databases to track new and changing legislation. We also have experience presenting data to conservation commissions and negotiating project and site-specific requirements.

## PROJECT HIGHLIGHTS

### **Russell Road Widening Project Environmental Compliance Surveys- Quantico Marine Corps Base, VA**

Performed environmental due diligence surveys and assessments. Work included performing Environmental Assessments, delineation of wetlands in the project site, and a survey on endangered and threatened species. Due diligence surveys for Phase 1 of this project were completed ahead of schedule.

### **Environmental Advisory Services- Department of Homeland Security**

Provided nationwide environmental and OSHA audits, prepared Environmental Assessments and Environmental Impact Statements, and completed NEPA documentation. Developed an Environmental Management System. Identified programmatic gaps and assisted in promoting environmental policy coordination and ensuring policies, programs, and plans were in compliance with NEPA and related environmental legislation, including the Endangered Species Act, Sustainable Fisheries Act, and Marine Mammal Protection Act.

### **Sonic Drilling Services- Lockheed Martin**

IEI performed drilling, site investigation, disposal of investigation-derived waste, and decontamination for potential chromium contaminated groundwater in the City of Garfield for New Jersey Department of Environmental Protection and the U.S. Environmental Protection Agency. IEI has provided drilling services in support of contamination surveys at the Gowanus Canal Superfund Site in New York.

*"IEI has continuously provided stellar environmental services to Tidewater. They have performed all work on time and have provided knowledgeable personnel to support the field crew at Fort Belvoir over the past two years. IEI will be absolutely considered for future support."*

Sam Yoon, PMP, Tidewater, Inc.

## PRACTICE LEADER

**Channa Bambaradeniya,  
Ph.D., PWS, CHMM, PMP**

Mr. Bambaradeniya has over fifteen years of environmental consulting experience, including international assignments in Asia and East Africa. His expertise includes designing and implementing biodiversity surveys in wetland and forest ecosystems, and conducting environmental impact assessments. He has developed over 50 peer-reviewed technical publications related to biodiversity conservation and has presented technical papers at over 25 regional and international symposiums and conferences related to ecology and biodiversity conservation. Through his experience he has performed numerous biodiversity surveys, environmental due diligence assessments, and assessments of globally endangered species in over 30 countries.
