FACILITIES. INFRASTRUCTURE. TECHNOLOGY. ENVIRONMENTAL.

MISSION READY BUILD ENVIRONMENTS

U.S. Small Business
Administration

WOSB CERTIFIED

Complex mission? Bring IEI to the table.

Inspection Experts, Inc. (IEI) delivers integrated facilities, environmental, construction, engineering, inspection, and technology solutions to federal and institutional clients worldwide. Since 2004, IEI has helped civilian and defense agencies operate, maintain, assess, modernize, and protect critical facilities, including occupied, secure, and mission-critical environments where downtime is not an option. By bringing eight disciplines together under one accountable organization, IEI gives contracting officers a single, proven partner .

01 Facilities Operations & Maintenance

Comprehensive O&M, engineering, maintenance, and lifecycle support for complex government facilities.

02 Smart Buildings & Building Automation

BAS, controls, analytics, and energy management that measurably improve existing facilities.

03 Environmental, Safety & Industrial Hygiene

Environmental compliance, occupational safety, and IH support for regulated facilities.

04 Construction & Infrastructure

Construction management, renovation, modernization, and design-build in occupied, secure facilities.

05 Asbestos, Lead & Hazardous Materials Abatement

Asbestos, lead, mold, PCB, and hazmat abatement executed under strict federal safety requirements.

06 Housing & Inspection Services

HUD, NSPIRE, and municipal inspection programs delivered at volume with technology-enabled QC.

07 Technical & Advisory Services

Master planning, real-property strategy, and engineering advisory for DoD and federal portfolios.

08 Technology & Innovation

Inspection platforms, facility analytics, AI decision support, and remote investigation.

Agencies We Serve

Proven

Two decades supporting government clients in complex, secure environments.

Integrated

One solution for facilities, construction, engineering, environmental, inspection, and technology.

Agile

Flexible teams built around the client's mission, not a predefined operating model.

Innovative

Technology applied where it improves safety, performance, reliability, cost, or decisions.
